## Summary

---

Development sector professional with 5+ years of experience in program implementation, monitoring, field coordination, and data-driven reporting. Skilled in data collection, validation, dashboard development, and performance analysis using Power BI, Excel, SQL, and Python. Experienced in working with stakeholders and field teams to improve reporting accuracy, program monitoring, and decision-making for community-focused initiatives.

## Monitoring & Evaluation Skills

---

- Machine Learning: Python, Numpy, Pandas, Scikit, Matplotlib
- API integration: FastAPI, LLM integration
- Data Collection & Validation
- Program Monitoring & Reporting
- KPI Tracking & Performance Analysis
- Qualitative & Quantitative Data Analysis
- Dashboard & Report Development
- Data Cleaning & Data Management
- Stakeholder Coordination
- Documentation & Presentation Preparation
- Field Team Coordination
- Process Improvement & Problem Solving

## Technical Skills

---

- Power BI (DAX, Power Query)
- Excel (Pivot Tables, VLOOKUP)
- SQL (MySQL, SQL Server)
- Python (Pandas, NumPy, Scikit, Matplotlib)
- FastAPI
- LLM Integration
- Microsoft Forms
- Google Sheets

## Professional Experience

---

### Assistant Manager (Technology & Innovation) [Learning Links Foundation]

Since March 202

- Supported monitoring and evaluation activities by collecting, validating, and analyzing program and beneficiary data to track performance indicators and program outcomes.
- Developed and maintained dashboards, trackers, and reporting formats using Power BI and Excel to support data-driven decision-making across education and community-based programs.
- Coordinated with field teams, stakeholders, and government partners to ensure timely and accurate data collection, reporting, and program monitoring.
- Conducted qualitative and quantitative analysis to identify trends, performance gaps, and opportunities for program improvement.
- Prepared regular reports, summaries, and visual presentations for internal reviews and stakeholder communication.
- Assisted in strengthening data quality processes through data validation, follow-ups, and process improvements.

- Supported program teams in understanding reporting formats and monitoring tools to improve consistency and reporting accuracy.

### **3D Design Engineer [Numel Solutions]**

**Mar 2022 – Feb 2023**

- Maintained structured project documentation and tracked prototype development activities to support performance analysis and process improvements.
- Assisted in coordinating design workflows and analyzing production data to improve efficiency and scalability.

### **Director [Trigid Innovations Pvt Ltd]**

**Sep 2019 – Feb 2022**

- Led operations, coordination, and workflow management while ensuring effective tracking of project activities and performance.
- Managed client communication, documentation, and reporting processes to support operational efficiency and service delivery.
- Monitored project progress, identified operational challenges, and implemented practical solutions to improve productivity and outcomes.
- Coordinated cross-functional activities and maintained structured records to support planning and decision-making.

## **Projects**

---

### **AI Placement Mentor API | Python, FastAPI, Scikit-Learn, Gemini AI, Pandas ([GitHub](#))**

- Developed an AI-powered placement assessment API that evaluates student aptitude, communication, and coding skills. Implemented a Decision Tree Classifier to predict placement eligibility and integrated Gemini AI to generate personalized improvement recommendations. Built RESTful endpoints using FastAPI and managed student records using Pandas-based data storage.

### **Program Impact & Performance (Power BI & Excel)**

- Consolidated data from multiple sources, including Excel (OneDrive) and Microsoft Forms, to build a unified dataset for program monitoring
- Developed dashboards to track KPIs such as beneficiary enrollment (students and community), training hours, session delivery, and impact metrics against targets
- Analyzed location-wise and employee-level performance to identify gaps, measure program quality, and improve outreach effectiveness
- Enabled data-driven decision-making for target setting, performance recognition, and program optimization through actionable insights

### **Expenditure Analysis & Management (Power BI & Power Automate)**

- Developed an end-to-end Power BI dashboard to track expenses and investments against defined budgets and categories.
- Integrated data from Google Sheets and performed data cleaning and transformation using Power Query.
- Created DAX measures, KPIs, and dynamic titles to enable real-time performance tracking and insights.
- Implemented automated data refresh using Power BI Service and Power Automate to ensure up-to-date reporting.
- Designed interactive visuals to monitor spending patterns, category-wise limits, and financial trends for better decision-making.
- Applied best-fit visualization techniques (heatmaps, trend lines, distribution charts) for actionable insights.

### **Retail Revenue Insights (SQL Project)**

- Built a structured MySQL database using 100K records, defining primary/foreign keys and constraints across tables (customers, locations, orders, products, payments)

- Performed SQL-based analysis to evaluate customer behavior, product performance, and sales trends
- Conducted revenue analysis including year-over-year comparisons and growth metrics
- Generated business insights to support data-driven decisions on sales strategy and product optimization

Education

|                                                  |                     |
|--------------------------------------------------|---------------------|
| Indira Gandhi National Open University           | India               |
